Summary:

Driven software developer with 2+ years of professional work experience building, reviewing, and deploying full-stack web applications. Strong team-focused mindset as I support my peers and learn from them just as often.

Technical Proficiencies

Programming Languages

JavaScript, TypeScript, Java, C, C#, SQL, Bash, HTML, CSS, Python (basic), C++ (basic), PHP (basic)

Frameworks & Libraries

Angular, React.js, Next.js, Node.js, Express.js, ASP.NET Core, Blazor, TailwindCSS

Databases & ORM

MSSQL, Elastic, MySQL, PostgreSQL, MongoDB, Prisma ORM

DevOps & CI/CD Tools

Docker, Jenkins, GitHub Actions, Git

Professional Experience

Junior Software Developer

ThreatLocker, Orlando, FL — August 2025 – Present

- Diagnose bugs and deliver high-quality fixes for over 780 Jira tickets (~3 per day) – counting
- Resolve outages and critical issues within two hours by collaborating with infrastructure and support teams
- Review pull requests from junior developers, providing detailed explanations and actionable guidance
- Ship high-priority features within 24 hours of development, enabling faster release cycles

Application Technician

ThreatLocker, Orlando, FL — June 2025 – August 2025 (Internally Promoted)

- Tested and updated application definitions using Hyper-V and other internal tools
- Created, tested, and deployed automation scripts to remote servers with fail-safety and logging; saving around three work hours per day for the department

Computer Science Tutor

Valencia College, Orlando, FL — Jan 2023 – June 2025

- Delivered tutoring for C/C++, Java, Python, and networking fundamentals across coursework and student projects
- Supported students in debugging and grasping algorithmic concepts, boosting confidence and performance
- Provided help desk support and resolved technical issues on lab systems and student laptops

Projects

Staff Web Panel (Sept 2022 – Dec 2024)

- Created real-time admin dashboard using ASP.NET Blazor for player tracking and moderation workflows
- Integrated with gameplay data via REST API, reducing manual moderation tasks by 80%
- Implemented real-time socket communication to reflect in-game changes instantly in the web interface, enhancing moderator response time

Education

B.A.S. in Computing Technology & Software Development

Valencia College, Orlando, FL

GPA: 3.62 | Graduated: Summer 2025
